Benign Lesion Policy

Benign lesions are "spots", "bumps", or "tags" on your skin that are not medically necessary to remove.

Many times we are asked to remove these types of lesions. We are not allowed to bill removal of these lesions to your insurance company. If you elect to have them removed, you will be charged for this as it is not a covered service. The cost for the removal of most of these lesions is around \$125.00. Of course, a copy will also be charged along with your office visit for your evaluation and any other medically necessary problems addressed.

PLEASE NOTE: YOU WILL BE RESPONSIBLE FOR YOUR COPAY, AS WELL AS YOUR COSMETIC PAYMENT TODAY.

I am aware of this policy and if needed, agree to pay for this uncovered service, as well as my copay, at the time of my appointment.
